

## **1992-1995 Honda Civic Engine Bay Chassis Hardware Kit**

### **Supplied in the kit you will find:**

**(42) 6x16 (long) bolts**- fender top (3), fender sides(2), fender bottom(1), front of fender to bracket(1), headlight top(4), front bumper(5), rear bumper(5), hood latch(3), upper hood hinge(4), lower hood hinge(4), fuse box (3)

**(12) 6x12 (short) bolts**- headlight fuse box(2), clutch reservoir bracket(2), throttle cable bracket(1), radiator stay(1), coolant reservoir bracket(1), a/c stay(2), ground strap to valve cover(2), battery ground cable to chassis(1)

**(4) front strut nuts**

**(4) upper control arm nut**

### **Required tools:**

10mm socket- 6x16, 6x12

14mm socket- front strut nuts

17mm socket- upper control arm nuts

It is recommended to remove and replace (1) bolt/nut at a time to maintain alignments and to hold parts in place.

**Please note: hardware may have shifted during shipping and may need to be assembled before installation.**
